

Invitation for the *Second International seminar on Biocosmology*

July 24-27, 2011, in Veliky Novgorod, Russia

Host and organizers of the Seminar:

**Novgorod State University after Yaroslav-the-Wise (<http://www.novsu.ru/english/>);
and the *Biocosmological Association* (<http://en.biocosmology.ru/>)**

As compared with the First International seminar on Biocosmology, three substantial modifications are introduced.

First: the topic of the Seminar is approved — “Biocosmological evolutionary cyclic triadicity — triunity and three-dimensionality of scientific methodologies”.

The general points of the Biocosmological “All-Embracing Triune” approach is given in the article that is published (and available online) in the «Journal of Futures Studies», see:
<http://www.jfs.tku.edu.tw/14-4/A04.pdf>

Second: the organizational form of the Seminar will follow the principle of conducting panels or discussion groups (organizing discussions of actual issues on the basis of pre-planned and prepared presentations); to this effect composing each group of 5 members: chairman, 3 speakers and a discussant (a colleague who is competent in the matter under discussion, and who critically summarizes the given presentations). For his part, chairman of a panel carries out the procedure rules (including time-limit – strictly 90 minutes for each panel) and, jointly with the discussant, – manage the course of the discussion on a given topic. Each participant can be the organizer of the panel (of her/his participation), as well as each member of the Organizing Committee can execute the role of organizer (regardless of personal involvement).

The *third* significant point reflects our strategy of the essentially international cooperation in the course of the Biocosmological project. This is the fundamental principle of the Biocosmological Association – Biocosmology is meaningful exclusively on a worldwide scale (in the universal and all-embracing consideration of the global organic development); thus, – Biocosmological project becomes possible exclusively through an effective international cooperation. Therefore, as provided by this need, – the structure of organized panels should include representatives of two or more countries (otherwise, the application will not be accepted for review).

Deadline for the panel proposals has expired on February the 1st, 2011.

The expiration date for individual proposals (oral presentations) is set on the 10th of April, 2011.

The contact e-mail for the submission of proposals –
